REFORE YOU BUY

A Suit for \$7.50 see ours at \$6.00.

A Suit for \$10 00 see ours for \$8.50.

A Suit for \$12.00 see ours for \$10.00.

A Suit for \$15.00 see ours for \$12.50!

THE WHY AND THE WHEREFORE:

WE haven't begun to cut prices. Nobody else has-except on paper. We don't NEED to cut prices in order to be lower than other houses. We are simply in position to get along with less profit, and we are selling to do so. We believe it's good business to do it. The comparative figures above do not lie. They represent ACTUAL FACTS. If you doubt-give us the benefit of the doubt-only to the extent of coming to investigate.

We've got everything in Clothing that any other Anderon Store has, EXCEPT TRASH, which we most positively will not handle. We carry no Suit cheaper than \$4.00 for men, and none cheaper than \$1.00 for boys, because any to etail for less are "simply rotten." And please remember hat everything in this house is NEW and Up-to-Date.

VESTEE NOVELTIES FOR THE JUVENILES.

Our prices begin at \$2.00, for which we have really handome Suits. At \$5.00 we sell the finest. 50c. to \$1.00 savng on these.

AS TO FURNISHINGS

We have already been accused of selling Furnishing Goods at less than cost. Be that as it may, we're selling lothing just as much cheaver than our accusers. Your money back if you want it.

COL. BOONE AT HOME.

He is Again in the Railroad Swim.

Zanesville (Ohio.) Times, Sept. 29.

For the information of the people of Zanesville all of whom are interested in the success of Colonel Boone, a short statement of the present condition of his Black Diamond railway project is not out of place.

ject is not out of place.

This railroad movement of Colonel Boone's calls for the construction of 1558 miles of road, at a cost of—if single track, \$48,650,000—(an average cost of \$32,747 per mile of track)—if double track of \$67,550,000, (an average cost of \$54,083 per mile, or \$27,041.50 per mile of track.) Whilst the work cut out by Colonel Boone is one of great magnitude, still he is the only head center so to speak. By his plan of promotion he has taken the public residing along his several lines into close co-partnership, which makes it practically impossible for any of the old corporations to upset his plans.

Colonel Boone, who is now in Zanes-ville, says he is well pleased with the subsidity carried last Tuesday at Greenfield, Ind., and that he will give Blue River township along with Green township, of Hancock county, another chance to redeem itself. Colonel Boone says he now has all of his plans well in hand and practically little to do but secure the voting of the sudsidies, which, with the old construction work done before the war, he will have fully five millions of dollars with which "to put the polish on the piano"—a favorite expression of the Colonel's.

Col. Boone reports that Sir Tomas S. Tanered will be at Greenfield, O., to-night; New Holland, O., Friday night, and Columbus, O., Saturday evening. Some of Colonel Boone's plan's are unique and differ materially from those in vogue. He says the time has come for a change—everything ject is not out of place.
This railroad movement of Colonel

from those in vogue. He says the time has come for a change—everything else has changed excepting the way railroads are operated. Amongst the innovations to be made by the Black Diamond system every

innovations to be made by the Black Diamond system are:

1.—To open the road as a toll road highway, allowing the trains of foreign corporations to be passed over the Black Diamond Highways upon paying toll at so much per ton per mile, and so much per passenger per mile—in other words operate the road apon the same principle a turnpike is handled, free to all upon paying toll.

free to all upon paying toll.

By declaring the road a toll railroad highway will forever prevent any portion of its line from being parallelled

-by new construction.

2.—The Black Diamond to be a twocent-per-mile road with this induce-ment to encourage the public to travel—one day in every month the rate for passengers to be one cent per mile—each excursion day to be known in ad-

each excursion day to be known in advance by adopting the plan of having it one day later than in the previous month, barring Sundays. Thus if the first excursion day was October 1, the next would be November 2, December 3 and so on.

Colonel Boone says the New York Central is the greatest and best local road in the world. Its passenger rate was fixed by the legislature of New York at two cents per mile, made at the request of the late Commodore Vanderbilt, who was not a railroad man, but a steamboat man. Colonel Boone says he gets his ideas from his training during the Star route days. man, but a steamboat man. Colonel Boone says he gets his ideas from his training during the Star route days. Colonel Boone was known as the Star Route Prince, the records at Washington showing that he controlled at one time more than 1100 contracts with the U.S. government, in fact about one-sixth of all the service then in operation. Colonel Boone says that while he had to pass through the fiery furnace of persecution yet with it all he is proud of his Star Route record. It is from his Star Route experience, says Colonel Boone, that he has the tact and energy to tackle the buildins of the Black Diamond system which when completed will comprise 3,115 miles of road. If any one doubts that Colonel Boone is a bold and daring operator, he should consult the history of the two Star Route trials which has been published in book form.

published in book form.
Colonel Boone will join the inspection party at Columbus Saturday evening. We glean the following from our

GREENFIELD DEPOT, IND., Sept. 27.—
The railroad election in this (Center) township to-day for \$76,426 subsidy for the construction of the Indianapolis, Vevay and Tidewater Railway, of the Black Diamond System, was carried. The majority in the township for the appropriation was 403. In Blue River township the amount of \$17,941.10 subsidy in the interest of the railroad was defeated by 76 majority.

Mr. E. E. Watts, civil engineer, of Princeton, Ind., in charge of the Black Diamond railway surveys in the Hoosier State, with 225 miles already located and 325 miles projected, was at the Grand yesterday.

"The lines surveyed in Indiana go through the best coal and agricultural lands in that State," said Mr. Watts, "which would be a most valuable feeder. to any railway system. The coal area is 2,500 square miles, and many of the veins run from 6½ to 8½ feet and the quality is fine. Pike county, which the line crosses for twenty miles, has, according to the latest reports of our Geological Director, the best coal in the State in vast quantities. The line also runs through the picturesque French Lick and West Baden Springs Valley, familiar to many Cincinnatians. It is my opinion that the road will be built, and if the report of the great English Engineer, now examining the surveys is favorable, and the expected British capital is put up, the entire system of 1,558 miles can be constructed in 18 months. With a corps of surveyors I located a few years since 63 miles of the Rock Island road, upon which we did not start surveying until August 10, and by January 1 of the following year, less than five months, the line was finished. Hundreds of miles of this projected Black Diamond road could be built as rapidly as upon the level plains of the west, and, with our improved methods of railroad construction, past records could be easily broken."

opinion, it can be seen that he is favorably impressed with the country he has passed over so far, and with the excellent low grade found by the engineers. At no place on the entire system does the grade exceed 66 feet to the mile. The officials of the road are very jubilant over the prospect for the early flotation of the bonds. The inspection party is being heartily received at all points along the proposed line,"—Cincinnati Enquirer, Sept. 28.

"Mr B. F. Hutchcraft, of Lexington, Ky., and Mr. A. Cunningham, of this city, left the Grand for Jellico, Tenn., to capitalize a company of \$100,000 for washing nut and screened coal, whereby thousands of tons will be put into superior condition for use which are now scarcely salable. This character of coal is only worth 15 cents a ton and by the process owned by Mr. Cunninghame its value is increased to 50 cents a ton. In a Virginia mine now owned by Mr. Cunninghame only two car loads of this inferior coal was shipped previous to his process being put in operation, and since that time 1,580 cars of this wonderful improved coal has been shipped from that one mine. The patent was brought to this country The patent was brought to this country by Mr. Cunninghame, who is a Scotchman, but who has resided in Cincinnati for some years."—Cincinnati Enquirer, Sept. 28.

Sir Thomas S. Tancred, the most em-inent British railway engineer living, arrived at the Grand hotel yesterday inent British railway engineer living, arrived at the Grand hotel yesterday morning to pass upon the surveys and profiles of the proposed Black Diamond railroad, from Ohio and Indiana to the sea at Port Royal, S. C. He is accompanied by Hon. Tl C. Dickinson, of Washington, D. C., who is the financial agant of the road in Europe. This great engineer, Sir Thomas S. Tancred, is here to go over the entire route, which will take him six weeks by buggy travel, and upon his report is contingent the capitalization of the route by English people. Yesterday at the Grand there met Sir Thomas Tancred a number of representative citizens along the proposed route to assure him of an earnest of their intentions in the road. No question about getting the money to build the road. The question at issue is, will Sir Thomas Tancred approve of Colonel Booke's plan of building all the lines of the Black Diamond double track? Sir Thomas Tancred will leave here Thursday for a personal observation of the route, first going over the line to Columbus and then doubling back to Dover, Ky., and on over the main line to Port Royal, S. C.—Cincinnati Enquirer, Sept. 20. C .- Cincinnati Enquirer, Sept. 20.

The capitalists and others interested in the plan for the construction of the Black Diamond railroad from Cincinnati through the southern coal fields to Port Royal, Savannah and Charleston, were introduced on Change yesterday by W. M. Lemon, and were shown the courtesies of the floor by the members. The party included Sir Thomas S. Tancred and Hon. T. C. Dickinson, both of London, England: Hon. William Kirkby, Toledo; Col. James N. Boyd, Dover, Ky., Col. A. E. Boone, Zanesville, Ohio, the projector of the system; B. R. Hutcheraft, Lexington, Ky.; Captain W. M. Crawford, Columbus, Ohio; J. E. Anderson, Dover, Ky., and Fred James, Austin, Tex. The first named man on the list is one of the greatest of English engineers, and with Mr. Dickinson, the second on the list, who is the financial agent of the system across the water, is here to go over the entire route of the proposed road. The capitalists and others interested tem across the water, is here to go over the entire route of the proposed road. He has the capital back of him, and if his report is favorable to the invest-ment of the money the road will be begun at once. The party was receiv-ed by President West, of the Chamber, and given a welcome and an assurance that the Exchange was theirs while here. If the road is built it is proposed to come into Cincinnati to the Central Union depot by an elevated track along Front or Water street.—Cincinnati Enquirer, Sept. 21.

Sir Thomas Tanered, the expert engineer of London, England, accompanied by Hon. T. C. Dickinson, of Washington, D. C.: Hon. William Kirkby, of Toledo, O.; Mayor W. J. Kennedy, of Carlisle; Messrs. W. B. Crenshaw, Sell, Renaker, W. T. Northentt, and Captain B. T. Riggs, of Cynthiana, arrived here Wednesday afternoon and remained until yesterday morning. These gentlemen accompanied Sir Thomas Tanered on his tour of inspection of the Black Diamond line from Cynthiana to Sharpsburg. They returned to Cynthiana yesterday, or inspection of the Black Diamond line from Cynthiana to Sharpsburg. They returned to Cynthiana yesterday, and to-day Sir Thomas will start on the line from Cynthiana to Columbus, O. After this has been gone over he will return to Sharpsburg and proceed south on the line to Port Royal, S. C. It will take Sir Thomas about six weeks to complete his work here. When that is finished he will return to England to make his report to the capitalists who are waiting to furnish the money for the construction of this great railway system. If his report is favorable work will be begun within a few months. Everything indicates that a favorable report will be made.

We have said it before and we say it again—The Black Diamond will be built and in operation via Sharpsburg before a great while.

Many of our most prominent citizens called on these distinguished guests at the City hotel Wednesday night—The World, Sharpsburg, Ky., Sept. 23.

Onick Work.

San Juan de Porto Rico, Oct 1-The Spanish transport Isla de Pana arrived here this morning and a secarrived here this morning and a sec-ond transport is expected to-morrow. These with a hospital ship, which will come from Havana to remove a num-ber of sick troops, will carry away about 3,500 Spanish soldiers. Suffi-cient vessels are said to be on their way d here to remove the remainder of the troops. The Spaniards are now arranging for the transportation of officials and their families back to Spain. The official government Gazette announces that the terms of officers of judiciary and government employes will end as soon as the island is for-mally delivered to the United States.

judiciary and government employes will end as soon as the island is formally delivered to the United States.

Elgin Anderson, editor of the Dover (Ky.) News was at the Grand yesterday. He says:

"Sir Thomas S. Tancred and party inspecting the Black Diamond system of railways, spent Sunday at my town, leaving Monday morning for Ripley, Ohio, to take up the Ohio division. While Sir Thomas does not express an OF) HILLINGSATIONALLIN

Two Divisions For Cuba

WASHINGTON, Sept. 27 .- A comprehensive programme for moving the troops to Cuba has been outlined by the war department, and its initial features have been decided upon. The result is due to directions given by the President September 19 to the effeet that details of troops be made for Cuba. Acting on this Major General Miles outlined a plan for sending two divisions to Cuba, the first one under command of Major Gen. Wade, to leave in October, and the second division under Major Gen. Fitzhugh Lee, to leave in November. Each division will embrace about 6,000 men, so that the plan is to have some 12,000 troops in Cuba or on the way within the next sixty days.

From the fact that they will go to Cuba it does not mean that they will proceed directly to Havana. On the contrary, the outlook is that there will be very few troops at Havana, the bulk of them being scattered throughout the western end of the island, garrisoning the small towns, and thus gradually putting into effect the military occupation of the island. In anticipation of the move the quarter master's department is preparing to have transports available for the

The organizations forming the October Carales tober divisions are as follws: Cavalry brigade, composed of the 7th and 8th United States eavalry, to be commanded by Brig. Gen. L. II. Carpenter; 1st infantry brigade, composed of the 1st infantry and the 4th United States volunteer infantry, to be commanded by Brig. Gen. Simon Snyder, United States volunteers; 2d infantry brigade, composed of the 1st United States infantry and the 6th United States volunteer infantry, to be commanded by Brig. Gen. E. B. Williston, United States volunteers.

The order leaves open the command of the divisions, but Gen. Snyder will be in temporary command until a permanent division commander is chosen Gen. Miles' recomendation of General Wade for this command is likely to be carried out, though it is still open, owing to the doubt as to Gen. Wade's being free from his service at the head of the Cuban commission now holding sessions at Havana. Although the November divisions, under command of Gen. Fitzhugh Lee, has been fully projected as a part of this same programme, its formal execution will be deferred for a time. The regiments forming the November division embrace both cavalry and infantry, with Gen Summer in command of the first brigade.

Raising the Colon.

WASHINGTON, Sept. 29 .- Assistant Secretary Allen, who has been directly in charge of the arrangements made such of the Spanish war ships sunk or stranded in the battle of July 3 as can be recovered, said to-day, referring to Constructor Hobson's work on the Teresa, that the navy department had given the young constructor all of the assistance that it was possible to extend in the prosecution of his work. Moreover it is now proposed to give further aid in his effort to raise the Colon, by far the finest ship of the Spanish squadron. Whatever credit has been carned by Constructor Hobson by reason of the Teresa would, in the opinion of Mr. Allen, be largely exceeded if the attempt to raise the Colon results successfully. In the case of this ship the young constructor has pledged his professional reputation against the unanimous opinion of all of the expert wreekers who have ex-anined the ship. Yet the navy department is unhesitatingly supporting Hobson's judgment, as is indicated by the fact that yesterday it shipped from New York \$20,000 worth of specially manufactured rubber air bags to be used in lifting the Colon. Aside from the sentenial reason for sparing no effort to save this ship, the navy department is satisfied from the re-ports of the divers who have investigated her condition that she is well worth, from a purely momentary point of view, the expenditure of a considerable percentage of her original value, about \$4,000,000, if there is reasonable prospect of raising her
